HOROSCOPE

JULY 6 - JULY 12, 2023

ARIES (Mar. 21-April 20)

Your devotion will be persuasive. Peers may not be on your side. You will find that uncertain individuals will want to draw you into joint ventures. Travel and creative hobbies will be your best outlet.

TAURUS (Apr. 21-May 21)

It's hard to stay mad if the object of the anger refuses to react. Minor accidents could occur if you don't take precautions. If you join intellectual or cultural groups, you should meet individuals who stimulate you. Be sure to take advantage of the opportunities that exist.

GEMINI (May 22-June 21)

Your practical approach to life may charm someone who has been observing you. Deceit with coworkers is apparent. You will be overly generous with children this week. Don't be afraid of opposition; your suggestions are valid.

CANCER (June 22-July 22)

Don't let your emotions interfere with moneymaking deals. A friendship might suffer if money becomes an issue. Empty promises could be likely where work is concerned. Travel for business or pleasure.

LEO (July 23-Aug 22)

You should get involved in competitive sports this week. Real estate ventures will be to your advantage. You can have a great time if you go out with the one you love. Opportunities to pamper yourself may unfold.

VIRGO (Aug. 23-Sept. 23)

Short trips will prove to be more fruitful than you imagined. You might get behind if you spend too much time debating senseless issues. Spend some quality time with the one you love. Your talents will shine at work. Involvement in groups of interest will bring you in touch with important individuals.

LIBRA (Sept. 24-Oct. 23)

Real estate ventures will be to your advantage. Invite friends or relatives into your home. Don't push your luck with authority figures. A passionate party for two might be just the remedy.

SCORPIO (Oct. 24-Nov. 22)

Changes to your self image will be to your benefit as long as you don't over pay. Keep your wits about you and be sure that you can trust those you confide in. You should get out and meet new people this week. Don't expect anything for nothing and you won't be disappointed.

SAGITTARIUS (Nov. 23-Dec. 21)

Changes at home might come fast and furious. You may want to take a trip; however, before you do, make sure that your car is serviced properly. Try not to get upset or angry without having all the facts. Watch your weight gain due to water retention.

CAPRICORN (Dec 22-Jan. 20)

Take time to help children with projects that may be too hard for them to do on their own. Hide your cards and learn to say no. You have more than enough on your plate already. You may find travel to be most rewarding.

AQUARIUS (Jan. 21-Feb. 19)

You will be able to get your own way if you use your intellectual charm and know how. Don't let your jealous imagination play games with you. You will upset your partner if you have spent money on things that aren't necessary. You should be setting up interviews or sending out your resume this week.

PISCES (Feb. 20-Mar. 20)

Tempers will mount if you're too pushy at work or at home. You must not make unnecessary changes this week. If you can mix business with pleasure much can be accomplished. Make those phone calls and pay your bills.

Keep Passengers From Getting Hot Under The Collar

Summer maintenance tips

- Check your cooling system. The cooling system is your car's defense against overheating in the summer. Regularly inspect the coolant levels and ensure they are topped off. Also, examine the radiator for any leaks or signs of damage.

- Keep an eye on radiator coolant. Engine heat causes fluid to evaporate and break down over time. Old fluid can keep your vehicle engine from cooling properly. Find out from your service advisor if it's time to flush and replace fluid (check your owner's manual as well).

- Gauge tire pressure before leaving on a road trip. High temperatures can cause the air inside your tires to expand, leading to overinflation. Not all vehicles are alike. See your owner's manual for manufacturer's recommendations.

- Test battery condition before long trips. Heat can accelerate battery fluid evaporation and cause corrosion on terminals. An inspection also can let you know if the battery has any signs of leakage, cracks, or corrosion. Clean the terminals with a battery cleaning brush and apply a thin coat of dielectric grease to prevent future corrosion.

- Inspect the belts and hoses under the hood for any signs of wear, cracks, or leaks. Hot weather can cause these components to deteriorate faster, potentially resulting in engine failure.

- Maintain fluid levels because hot weather and long drives can increase the strain on your car's fluids. Regularly check the oil, transmission fluid, brake fluid and power steering fluid levels.

- Protect your car's interior. Prolonged exposure to sunlight and high temperatures can damage your car's interior. Invest in sunshades to protect your dashboard, steering wheel, and seats from harmful UV rays. Additionally, consider using seat covers and applying a UV protectant to prevent fading, cracking, and discoloration.

- Check the climate control system. A functioning air conditioning system is essential for a comfortable drive and keeping your car cool. Test your car's AC system and ensure it is blowing cold air. If you notice weak airflow or warm air, it may be time for a recharge or professional inspection to address any underlying issues.

- Clean air vents to increase flow throughout the cabin. Vents clogged with dust, bugs, pet fur and leaves can reduce air flow.

- Replace serpentine drive belts if they are worn or cracked. A broken belt can cause your engine to overheat and leave you stranded.

ARE THERE PROBLEMS RELATED TO SPAYING/NEUTERING PETS?

Submitted By
Patsy Nelson
from The Wagging Tail

Last week I addressed the pros and cons of spaying female dogs (article available upon request on our Facebook page). There was a push for spay/neuter clinics back in the 60's and 70's because of the overpopulation of dogs and cats, which has decreased somewhat but is still a problem. Responsible ownership meant adhering to such practices. Even today, at very young ages, kittens and puppies get cut and nipped before being adopted out to prevent procreation. There are indeed many irresponsible pet parents who find a kitten or a puppy from an oops situation and continue the neglect of seeing that neither get impregnated or is responsible for impregnating receptive females. Dogs, and especially cats, reproduce quickly producing thousands of animals within a few generations. In many but not all countries, sterilization is the only method of control.

Spaying or neutering or de-sexing are terms that refer to the removal of the ovaries and uterus (hysterectomy) of female animals. A female or male dog that is not sterilized is referred to as intact. In the last decade there has been increasing data that spaying/neutering at a young age, before full hormonal development, can result in serious medical problems for pets. I am always alarmed and dismayed to find out that my customers may have been advised to consider such operations at six months of age.

Reputable research has been gaining favor against early spay/neuter because of the reproductive hormones are necessary for healthy legs and joints and warding off potential cancers. Other negative manifestations of early sterilization can be obesity, incontinence, fear/aggression, and the advent of autoimmune diseases such as diabetes. The Parsemus Foundation (info@parsemusfoundation.org), can provide data and references you can use when discussing the risks and benefits with a knowledgeable veterinarian. There are hormone sparing methods available that may be more beneficial to your pet. OSS, or Ovary Sparing Spay for females, and vasectomy for males. Opinions and results are often based on the breed, size, age, and other factors. An article published by Hart and Colleagues (2020), suggests taking note, "of the information about gonadectomy risks for specific breeds and mixed breed dogs and stay abreast of recent updates in this rapidly evolving area of research." There is training and behavioral advice sites on Facebook for intact dogs that may be very helpful.

My personal advice is to definitely delay early gonadectomy for young dogs. Unless, of course, there is a medical issue, like the testicles have not dropped, or problematic hernias, etc. As long as your dog is not aggressive to other dogs, has good house and people manners, is not given the opportunity to escape your attention or yard, then wait.

Unless we can find a qualified groomer, we will no longer be grooming. However, we are able to help with (agreeable) cat and dog nail trimming. One grooming table is for sale. If something changes, we will publish the information.
