**NATIONAL DRINK WINE DAY**  
While February 18th is observed annually as National Drink Wine Day, it would be a shame to celebrate only one day a year. Perhaps this day is just a reminder to drink wine. Wine does have its benefits after all. Moderate drinkers of wine have lower risks of liver disease, type II diabetes, certain kinds of cancers, heart at-

tack, and stroke. It also can reduce the bad cholesterol (LDL) and increase the good (HDL). Drinking wine includes other benefits as well. When paired with the right meal, it enhances the flavors of spices, fruits, and sauces. A glass of wine helps relax us. Learning about wine keeps our minds sharp, too. Since the fruits, regions, and the making of wine have such a complex story, those who delve into find themselves traveling to learn more.

## Around the Cape

This elegant home was built by the renowned builder Anthony Christaldi using his stunning craftsmanship for crown molding, columns and intricate mill work throughout every room making the home an impeccable masterpiece. From the roof to the basement is nothing less than perfection. The entrance is enchanting with a large foyer and sweeping horseshoe stairs, a large family room, booklined study, formal dining room with wainscoting, recessed lighting around the ceiling and lovely artwork. A gourmet kitchen with custom cabinets, Sub Zero and Wolf Pro appliances, dining area overlooking the patio, at the top of the stairs is a sun filled room, featuring large windows for views, gas fireplace and the ambience for peace and quiet. Each bedroom is en suite with the Master bedroom having cathedral ceilings, his/her walk in closets, a soaking tub, fireplace and glass enclosed shower. If you like to entertain, the lower level is the place to be with a bar area, cafe with booths, billiard table, card table and your own theater and a Sauna. The backyard is spacious and private with a large deck and patio area as well as a small fountain. Located steps away from the Union League National Golf Course, great for the golf enthusiasts. The description and pictures do not do justice to what a personal tour can provide, your eyes will be amazed at the elegance and craftsmanship of this home. All furnishings are negotiable. There is an Home Owners Association and fees are \$450.00 a year. A copy of the HOA documents will be provided to Buyer. Seller is selling the home "AS IS" "WHERE IS", and needs to obtain suitable housing prior to closing.

### HOW TO COMBAT THOSE WINTER ODORS IN YOUR VEHICLE, PT 2

Mold is the silent enemy with over 100,000 different species, mold manifests in diverse forms and colors. Among the spectrum of mold colors, black is often the most recognized and feared. While not all black mold is toxic, certain strains can indeed be dangerous, causing severe health problems and even death. Yellow and green mold are also common colors, and these, along with others, have the potential to be toxic. It's imperative to treat all mold seriously and address them promptly and thoroughly. Contrary to the common belief that they only thrive in warm environments, molds have adapted to survive and grow in various climates, including colder temperatures, even within the confines of your car. Mold can initiate growth within 24 hours of exposure to moisture. Left unchecked, it can wreak havoc on your car's interior and pose health risks. The presence of dreaded toxic mold can escalate the problem significantly, potentially leading to symptoms such as vomiting, lung bleeding, and fatigue, particularly for individuals with compromised immune systems or a history of respiratory issues. If you are concerned about the specific mold you are dealing with or may be exposed to, there are numerous test kits available. Basic testing kits help identify the presence of mold, while more advanced tests can pinpoint the species and assess toxicity levels. Below are a few tips to help prevent interior mold and smells from taking over your vehicle:

- When not in use, if possible, park your car in a garage or an enclosed structure to minimize exposure to the elements and outside moisture.
  - Regularly inspect your vehicle for leaking areas that may let moisture in. Check the seals on doors and windows, and promptly address any identified issues.
  - For convertible owners, ensure the roof closes properly, is undamaged, and doesn't trap liquid in the top system.
  - Run the air conditioning intermittently in winter to circulate air through the system and prevent moisture buildup.
  - Always ensure doors and windows are securely closed when your car is not in use.
  - Avoid eating and drinking in the vehicle, but if you do, try to prevent spills, and promptly clean any mess.
  - Check floor mats for wet spots or puddles after exposure to snow, mud, or rain. Remove and clean mats if needed, allowing them to dry completely before reinstallation.
  - Regularly wipe down and clean the interior of your vehicle.
  - Remove and store sweaty workout clothes, wet towels, or musty items elsewhere, not in the car.
  - Be cautious about using air fresheners and sprays to mask odors. Address the root cause, as persistent issues can harm your interior and potentially impact your health.
  - Consider using waterproof mats for adverse weather conditions. Installing waterproof mats instead of carpet mats can be effective in preventing mold but remember to clean them thoroughly as water and mold can accumulate in crevices. Mike Pennington of Meguiar's offers the following suggestions for keeping your car's interior clean.
- For cloth materials:
- Remove spills or grime with a cotton terry cloth towel. Make sure it does not sit for an extended period.
  - Use a stiff nylon brush to scrub the material to prevent stiff and unattractive upholstery.
  - Before applying cleaning solutions, remove grime by vacuuming first.
  - Then lightly spray on your cleaning solution, making sure not to soak the surface.
  - Scrub the area again using a clean brush.
  - Lastly, dab the area using a clean terry cloth towel.

"MEET THE PACK!"**

**Talk about making a PAWS-itive impact!**

Becoming a puppy raiser or sitter makes a difference not only in those matched with a Seeing Eye dog but also allows you to join a community like no other. Seeing Eye puppy clubs consist of people of all ages and walks of life who all share the desire to help others.

A puppy raiser is the primary caretaker for a Seeing Eye puppy for about one year. A puppy sitter is someone who is available to help care for a puppy for short periods of time (typically for a night or weekend) when their primary caretaker cannot. This is a great way to get started in puppy raising, or to help out if you cannot commit to raising a puppy full time. We could not continue our mission without all our amazing volunteer puppy raisers and sitters.

If you are interested in joining our puppy raising community, please visit [seeingeve.org/raise](http://seeingeve.org/raise)

PD: A collage shows photos of a yellow Lab/golden retriever cross puppy sound asleep in a Seeing Eye staff member's arms, a German shepherd wearing a Seeing Eye puppy raising bandana sitting amidst daffodils with his head tilted, a young girl with the black Lab/golden retriever cross puppy she is raising sitting at her side, and a group shot of a puppy club sitting together at a park with puppies of all breeds. Text reads, "Join Our Family – Raise a Seeing Eye Puppy – [seeingeve.org/raise](http://seeingeve.org/raise)"

PPAWS (People & Puppies at Work for Sight) is a dedicated group of local families from Atlantic and Cape May Counties, which raise these amazing puppies for The Seeing Eye. Until a Seeing Eye dog is ready for training, he or she lives with a puppy raising or foster family that gives the dog love, gentle guidance, and consistent care. These volunteers nurture their puppy to accomplish its special destiny. If you are interested in raising a puppy for The Seeing Eye, call Peter at (609)804-8774 or visit [seeingeve.org/raise](http://seeingeve.org/raise) for info.

## MORE ABOUT PRO PLAN AND QUESTIONABLE PET FOOD INGREDIENTS

REPRINTED FROM PREVIOUS EDITION

Submitted by Patsy Nelson  
from The Wagging Tail

Immediately after my last article went into publication, I got an email from one company's representative with whom we deal-but not in commercial food products. This email was sent to all their retailers pertaining to the "rumors" about sick and dying pets who ate Pro Plan. Purina denied these rumors to be relevant, even suggesting some kind of conspiracy against the company. Even if they are rumors, which have not been proven yet, it does not negate the poor ingredients used, and the misrepresentation in their ads and packaging, beguiling customers into erroneous conceptions of noble, clean (not full of crap), healthy pet food.

The bag of food pictured in the article last week was Purina Dog Chow on which there is a plate of sliced chicken, yet the bag only includes some "chicken flavor." And they state in their full-page ad in Reader's Digest that the food (more like feed) has high-quality protein, no fillers and is 100% complete nutrition. The truth is that gluten and grain-based ingredients like rice, corn, wheat, and soy and vegetable by-products are fillers which means that they don't add any nutritional value but increase the volume/bulk of the bag of food. Meat By-products are not used in better quality pet food, but they can provide protein in the form of lungs, kidneys, liver, brains, and fatty tissue. If an ingredient panel on a bag of food starts with a protein like chicken, it must contain 95 percent of chicken (or salmon etc.) This main product must be at least 70% of the total products when counting the added water. Any meat meal is made up of remaining animal parts like extra meat, connective tissue, and offal (internal organs) and cooked at high temperatures before being made into a protein-packed powder, then made into meal.

(According to JustFoodForDogs.) Corn and wheat can lead to allergies and obesity (becoming sugar.) Soy is a filler "responsible for a huge portion of pet allergies that can result in sneezing, itching, swelling, anaphylactic shock, and death." (From another source on fillers.) The ingredients in Pro Plan chicken formula includes Rice, Whole grain wheat, Poultry by-product meal, Corn gluten meal, Whole grain corn, Wheat bran-all within the first seven ingredients. The top three to avoid when feeding your dogs (or cats) are corn, wheat, and soy. According to my google quest, PetSmart charges \$69.48 for a 35lb bag of Pro Plan Adult Chicken formula, which contains all these negative fillers and allergen producers. We sell Fromm Adult Gold Chicken (30 lbs. of all good ingredients by a five-generation family-owned Wisconsin company.) They don't advertise so they don't spend money on anything but making great dog and cat food. (The same goes for the other foods we sell.) The ingredients do not have any corn, wheat, soy or by-products, or anything else that is not good quality pet food. And this grain-inclusive food, not like the Pro Plan mentioned above, has flaxseed, menhaden fish meal, Wisconsin cheese, duck, lamb, carrots, sweet potatoes, and probiotics. The price is \$52.99, more than fifteen dollars less, and we track your purchases, so your 13th bag is free. The Fromm Company has (and we carry) over 40 varieties in just cat and dog and in various sizes. And all our food, any brand, is 100% guaranteed that your pet will love it and thrive, or your money back.

AGAIN, PLEASE PROTECT YOUR PET FROM CHILLY RAIN, WINDS, SNOW AND TEMPERATURES (EVEN IF IT IS COOL IN YOUR HOUSE.) IF YOU COVER UP, YOUR DOG SHOULD BE COVERED-UP. A HOUSE DOG DOES NOT GROW A WINTER COAT. YOU NEED TO BE SMART. Dogs suffer from joint pain and in cold temperatures the joint fluid may thicken creating more pain and the onset of or degree of arthritis.

Thank you for helping a small business stay in business.  
Check out our on-premises cat shelter.
