**FEEDING YOUR DOGS AND CAT
RAW MEATY BONES**

Submitted By
Patsy Nelson

Owner of The Wagging Tail 1987 - 2025

Many people are hesitant to feed their pets raw body parts because of possible harm to their teeth (cracking) or choking, or intestinal dangers. If fed properly they are great for removing plaque and tartar from the teeth, providing needed calcium, phosphorous, and magnesium, and vitamins A, D, and E (stored in the fat of the bone), possible fiber-if they contain hair. And, of course, the satisfaction cats and dogs derive from consuming food on the wild side.

COOKED BONES, whether boiled, baked, broiled, or fried, ARE DANGEROUS, because they become too hard, brittle, and sharp. They should never be fed to any animal and should be safely disposed of, especially if you have a garbage-hunting pet who can accidentally get into the remnants of your last night's barbecue. Also don't feed large meatless bones, as they can cut the gums. They don't have much nutritional value once the marrow in the middle is gone. Also avoid turkey and goose wings except for large to giant breeds, and drumsticks, turkey and goose legs, pork ribs and feet, and lamb, goat, and deer ribs. Check the web.

The Australian veterinarian Ian Billingsworth, who wrote the groundbreaking book, GIVE YOUR DOG A BONE, states that for the best results give to your pet once weekly. Raw bones are soft and pliable. Too much can result in crumply stool or constipation. Another important fact is giving the proper size to the pet. Mariah Pierson, the author of the You Tube channel and blog Paws of Prey is a certified canine nutritionist specializing in raw feeding. I watched her video on what animal parts are best to feed cats and dogs according to size, nutrition, ease of purchase, and price. (One can download her cheat sheets free of charge.) If you cannot find them in your local grocery, go to the closest Asian market. There is a large one at shopping center off Tilton Road in EHT. There is also a very good Vietnamese restaurant in the back of the supermarket.

Poultry necks and wings are the easiest and safest to feed to small dogs and cats. One blog mentioned cutting the connective skin at the joint that gives the wing its shape and then stretching out the wing. This method safeguards the pet from swallowing too much because by stretching it is elongated forcing the dog or cat to utilize their back molars to break it down. And it makes it easier to attract beginners to a new concept of eating. Body parts can be frozen, and some owners give them frozen. Most like to give them at room temperature. Poultry neck sizing suggests Pheasant or chicken for cats and small dogs, duck for medium to giant breeds, and turkey and goose for large and giant. Wing size for cats and small dogs include quail, pheasant, chicken, and duck. Medium to giant breeds chicken and duck, and Large to giant breeds, turkey wings. Other choices are backs, ribs, and heads. Check out available videos. My dogs love Northwest Naturals Freeze Dried Turkey, Chicken, and Duck Necks cut in small pieces.

"Happiness is a warm puppy." (Charles Schulz) My brother and sister-in-law just got two sister Yorkies, three months of age, Fanny, and Charlie, and are exhausted and deliriously in awe.

Articles are also on my Facebook page, Patricia Robinson Nelson. I would love your comments. Email me at patsyrob1@gmail.com with concerns.

HOROSCOPE

APRIL 2 - 8, 2025

ARIES (Mar. 21-April 20)

Energy shifts toward execution as plans begin taking real form. What you've been thinking about now requires action. Stay focused on follow-through rather than perfection. Progress builds through consistency.

TAURUS (Apr. 21-May 21)

A steadier pace brings clarity to something that recently felt rushed. You may find that slowing down actually moves things forward. Trust your timing instead of comparing it to others. Stability comes from patience.

GEMINI (May 22-June 21)

Conversations take on a more decisive tone as lingering questions get answered. You may need to take a clear stance where you once stayed flexible. Speak with intention and avoid mixed signals. Clarity strengthens connections.

CANCER (June 22-July 22)

Your attention turns toward maintaining balance between responsibilities and personal needs. Something small may require adjustment before it grows into a bigger issue. Stay present and responsive. Thoughtful boundaries keep things steady.

LEO (July 23-Aug 22)

Momentum builds around something that excites you, but it needs structure to last. Channel your energy into a clear direction rather than spreading it too thin. Confidence grows through focused effort. Keep your priorities tight.

VIRGO (Aug. 23-Sept. 23)

Details come into sharper focus, making it easier to move forward with confidence. What once felt uncertain now feels manageable. Avoid overanalyzing what's already working. Trust the process you've built.

LIBRA (Sept. 24-Oct. 23)

A shift in communication brings more ease to your interactions. You may notice things flowing more naturally without as much effort. Let conversations unfold without trying to control the outcome. Balance returns through simplicity.

SCORPIO (Oct. 24-Nov. 22)

Your instincts sharpen, helping you recognize what deserves your attention and what doesn't. A situation may reveal more than it initially showed. Move carefully but without hesitation. Awareness becomes your advantage.

SAGITTARIUS (Nov. 23-Dec. 21)

A renewed sense of direction makes it easier to commit to what matters most. Distractions lose their pull as priorities become clearer. Focus on what feels aligned rather than what feels urgent. Purpose drives progress.

CAPRICORN (Dec 22.- Jan. 20)

Your steady approach continues to pay off as results begin to take shape. Others may start to recognize the work you've been putting in. Stay grounded and avoid overextending yourself. Consistency remains your strength.

AQUARIUS (Jan. 21-Feb. 19)

New ideas begin to take on practical form, giving you something tangible to build on. What once felt abstract now feels actionable. Stay open to refining your plans as you go. Flexibility supports growth.

PISCES (Feb. 20-Mar. 20)

Emotional clarity strengthens your ability to make grounded decisions. A situation that once felt unclear now reveals its direction. Trust what feels steady rather than what feels urgent. Stability comes from within.

5 REASONS TO CHECK YOUR TIRE PRESSURE THIS SPRING

Checking your tire pressure may not always be top of mind, yet it remains one of the easiest ways to save on fuel and extend the life of your tires.

Proper tire inflation is essential to vehicle stability and reduces the risk of blowout, according to the National Highway Traffic Safety Administration. As spring temperatures fluctuate from cool mornings to warm afternoons, your tire pressure can change as well.

That's why you need regular tire checks for safe driving and reliable vehicle performance throughout the season.

5 Reasons to Check Tire Pressure in Early Spring
Rising temperatures affect PSI: As the weather warms, your tires can expand. If your tires were inflated during cooler days, spring heat can push them above the recommended PSI.

Better pressure means better fuel economy: The NHTSA notes that for every 1 PSI drop in tire pressure, gas mileage reduces by 0.2%. Keeping your tires properly inflated this spring helps your engine run efficiently and saves you money at the pump.

Temperature swings cause inconsistent pressure: Rapid temperature changes can confuse your tires. The fluctuations may trigger your Tire Pressure Monitoring System and make slow leaks harder to detect.

Proper inflation prevents premature tire wear: Underinflated tires put extra stress on tread edges and sidewalls. Overinflated tires wear out the center tread too quickly. Spring is the perfect time to correct these issues and extend your tire's lifespan.

TPMS doesn't always catch early problems: Most TPMS sensors only alert you once pressure drops 25% below the manufacturer's recommended level. This means your tires could be running low without a warning light. That is why you should always check your tires manually.

How to Extend the Life of Your Tires This Spring

Here is a practical guide from the NHTSA that keeps your tires in top shape and keeps you safe on the road.

Use the correct recommended pressure: Always inflate your tires to the PSI listed in your vehicle owner's manual or on the driver-side door jamb. Avoid using the maximum pressure printed on the tire sidewall. This is intended for heavy loads and not daily driving.
