OCTOBER IS FALL CAR CARE MONTH

Time to prepare your car for winter driving conditions.

Here are some things you can do to prepare your car for winter:

- Check fluids: Top off your oil, power steering fluid, brake fluid, transmission fluid, windshield washer fluid, and antifreeze/coolant.
- Check hoses and belts: Tighten belts and check for leaks, cracks, frays, or excessive wear.
- Check tires: Check the tread depth and pressure of all tires, including the spare.
- Check lights: Make sure all exterior and interior lights work, and that your headlights are properly aimed.
- Check heating, ventilation, and air conditioning (HVAC): Ensure your HVAC system is working properly so you can defrost your windows in colder weather.
- Check steering and suspension: Make sure you have good handling and control while driving.
- Check exhaust system: Look for leaks, damage, or broken supports or hangers.
- Check battery: Make sure your battery is clean and free of corrosion.
- Check brakes: Check your brake pads, linings, rotors, and drums.
- Equip an emergency kit: Include items like a blanket, hat and gloves, first aid kit, shovel, jumper cables, flashlight, and extra batteries.

ELK VELVET ANTLERS AND OTHER SUPPLEMENTS

Submitted By **Patsy Nelson** from The Wagging Tail

A few customers have asked me recently if I could get Velvet Antler supplements for their pets. I decided to do some research. It is quite expensive, and the way it is obtained is controversial. The benefits of elk and deer antlers has been known for thousands of years. They are loaded with vitamins and minerals. And they are high in chondroitin-which we sell in other supplements-and help pets with joint issues. Elk antlers that we sell for chewing purposes, ARE SHED NATURALLY, and make a wonderful gnawing experience for most dogs, and they help to clean a dog's teeth. It is recommended to start with the sliced version first, as the marrow is exposed. (If you wanted to get Velvet Antler supplements, however, the antlers must be utilized before they get hard, which means the animal must endure a possibly painful (the velvet part contains nerves and blood vessels) and traumatic experience.

Some farmers claim that they use a humane and cruelty-free procedure, but not all do, and it is difficult to really assess how most animals are treated. Some sources simply get the product from animals that are routinely slaughtered for the velvet. Even if, as some claim, they numb the area first, that numbing agent, a chemical, would be in the supplement.

Besides supplements that we sell like NaturVet, Ultra Oil, Grizzly, and Pet Natural, we sell goat milk in our freezer section. It is a great alternative to Velvet Antler Supplements. Goat milk is the most consumed milk in the world, and as it is often referred to as the universal mammalian milk, it is gaining popularity in the United States, for people as well as pets. It is more easily digestible and does not contain substances like alpha-s1-casein protein, and a form of beta-lactoglobulin and alpha-lactalbumin proteins that are all linked to allergic reactions. According to the Journal of American Medicine, goat milk is the most complete food known. "Raw goat milk contains vitamins, minerals, electrolytes, trace elements, enzymes, protein, and fatty acids." Humans and dogs can tolerate goat milk even with digestive issues. It is a source of easily digested probiotics that can help with many chronic diseases, including; liver disease, kidney disease, kidney stones, diabetes, Gl disease, poor digestion, diarrhea, malnutrition, and heavy metal poisoning. Fermenting goat milk adds even more probiotics, which helps with arthritis, irritable bowel syndrome, gastric ulcers, colitis, intestinal pathogens and even brain disorders.

We've been carrying small packets of Goat's milk by Honest Kitchen in a powder form that can be reconstituted with water as you need it. Now we added ones by Shepherd Boy Farms, which are packaged in mixable bottles as pint and quart sizes in a variety of flavors. We also carry a variety of frozen goat milk in pints and quarts, by Primal and Answers.

The sad loss of a young dog. A couple in North Wildwood took their two dogs to the beach for a run last week. The five-year-old dog (120 pounds) went playfully charging toward the bigger seven-year-old (150-pound) dog. Unfortunately, he crashed into his head and severed his spine. There was no way to save him. What a freak horrible accident.

Thank you again for choosing The Wagging Tail as Best of The Jersey Shore, three years in a row. And thank you for supporting a local small business. Come see our kittens and cats!
